

# Translational Research Partnership *Joint and Related Inflammatory Diseases*

**Translational Research Partnerships** are an internationally unique approach to supporting open innovation and collaboration with the life sciences industries.

They provide a single point of access to collaborate with **world-class investigators** in the **UK's leading academic and NHS centres**. Working in partnership with industry, they drive early and exploratory development of new drugs, technologies and other interventions.

Translational Research Partnerships offer:

- Recognised experience in current exploratory development protocols, expertise in pathophysiology and disease mechanisms, expertise in modelling
- Enabling technologies and infrastructure, including imaging, biobanks, accredited laboratory facilities
- Cohorts of well-characterised patients available for clinical development studies

## Joint & Related Inflammatory Diseases Expertise

- Arthritis (rheumatoid, osteoarthritis, psoriatic & juvenile idiopathic)
- Inflammatory skin disease
- Myositis
- Psoriasis
- Scleroderma
- Sjorgen's syndrome
- Synovitis
- Systemic Lupus Erythematosus
- Vasculitis

## Joint & Related Inflammatory Diseases Centres

- Cambridge NIHR Biomedical Research Centre
- Centre for Experimental Medicine & Rheumatology, Barts and The London School of Medicine & Dentistry
- Centre for Rheumatology, University College London
- Guy's & St Thomas' NHS Foundation Trust / Kings College London NIHR Biomedical Research Centre
- Imperial NIHR Biomedical Research Centre
- Manchester Academic Health Sciences Centre
- MRC Centre for Immune Regulation, University of Birmingham
- Newcastle NIHR Biomedical Research Centre in Ageing
- Oxford NIHR Biomedical Research Centre

As members of a Partnership, each centre has committed to work with industry through a consistent point of contact provided by the NIHR Office for Clinical Research Infrastructure (NOCRI).

**National Institute for  
Health Research**

Office for Clinical Research Infrastructure

To work with the Joint & Related Inflammatory Diseases Translational Research Partnership, please contact
