
IT'S NOBODY'S JOB...

A persistent barrier to innovation uptake is the responsibility of ownership.

However, identifying the most pressing problems and looking for solutions is rarely a part of anyone's day job.

Until this is actively built into a job description, it's unlikely to become business as usual.

This is why ABHI is calling on every NHS organisation to appoint a dedicated **Chief Innovation Officer** whose role will enable

hospitals to deliver efficiencies whilst adopting life changing HealthTech.

As part of each hospital Board, Chief Innovation Officers can make a fundamental difference to the NHS, whilst ensuring maximum value to the taxpayer.

ABHI

HEALTHTECH IN THE UK

HealthTech plays a key role in supporting delivery of healthcare and is a significant contributor to the UK's economic growth.

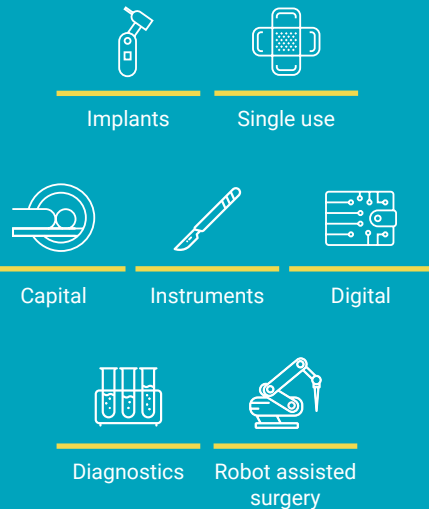

HEALTHTECH IS CRUCIAL IN THE TREATMENT OF A NUMBER OF CHRONIC AND LIFE THREATENING CONDITIONS

including cardiovascular disease, cancer, and diabetes.

HEALTHTECH IS THE LARGEST EMPLOYER IN THE LIFE SCIENCES

HEALTHTECH IS BROAD AND DIVERSE

In 2017 alone, the NHS conducted nearly **200,000** hip and knee replacement procedures, implanted over **60,000** cardiac devices and provided nearly **400,000** cataract operations.
