

MEDICAL DEVICE CRITICAL PRODUCTS LIST

Based on member feedback and stakeholder discussions, we believe this list covers the critical medical device needs for managing COVID-19 patients. This list **excludes** ventilators and associated equipment required for using a ventilator, CPAP, PPE and diagnostic testing equipment.

- Beds
- Clamps
- Proning blocks
- Stethoscopes
- Equipment trolleys
- Sliding sheets for moving patients
- Temperature probes and guards
- Medical tapes
- Skin protectants / barrier films
- Sequential compression devices (Clexane drug therapy or TED tights are alternatives likely less expensive and easier to obtain)
- Patient warming, forced air warming and fluid warming equipment
- Vital Signs monitors and leads including transport versions
- ECG dots
- Laryngoscope, adult & child
- Bougie
- Endotracheal tubes
- Tracheostomy kits and devices
- Oropharyngeal and nasopharyngeal airways.
- Incentive spirometer /Acapella valves
- Pulse Oximeter
- Ultrasound machines and gel with plastic sheaths to maintain sterility

IV Access & Equipment

- Pump stands/racking systems
 - Infusion pumps
 - IV sets – dedicated to infusion pumps
- 

- 
- IV sets- gravity lines
 - Syringe pumps
 - Syringe pump lines
 - Syringes, with significant demand on 50ml size
 - IV catheters
 - Cannulas
 - Arterial blood gas lines
 - 3 way taps for IV lines
 - Dressings for lines and cannulas
 - Stitches for line placement
 - Pressure Bags
 - Scalpels
 - Plastic trays

Bowel & Bladder

- Urinary catheters
- Catheter bags
- Bowel management systems

Critical life equipment

- Continuous Renal Replacement (CRRT) Machines
- CRRT filters, catheters and fluids
- ECMO machines & associated consumables
- Resuscitators

Nutrition support

- Enteral feeding pumps
- Litmus paper (for checking stomach pH)
- Enteral feeding lines
